Workshop

Case study:
"And the virtual world": Intervention model for the digital dimension in social space-oriented youth work with disadvantaged people

1. Identify vulnerable young people
2. Identify neighborhood challenges
3. Train young people to create video-games addressing those challenges
4. Peer learning workshops
5. Link the young "game changers" with policy makers
6. Dissemination to youth workers and policy makers

Content focus:
In a guide book, new education offer for youth workers based on how to train disadvantaged young people to video games coding to address neighborhood challenges
